Piero Lissoni Warm Collection è un progetto integrato di materie innovative – resine, cementi, legni lavorati a mano, microrivestimenti, pitture e smalti – coordinate in un'unica palette colori.

Un nuovo stile di design, studiato per interni, in cui i pavimenti, rivestimenti, pareti, infissi, complementi di arredo, corpi illuminanti e riscaldanti diventano una superficie unica e continua.

Piero Lissoni Warm Collection is an integrated project involving innovative materials – resins, cements, handcrafted woods, micro-coatings, paints and glazes – coordinated in a single color palette.

A new design style conceived for interiors, where floors, coatings, walls, fixtures, furnishing accessories, lighting and heating elements all become one single and continuous surface.
