Color Fill: colors and technology for decorative finishing of surfaces.

Tiles, natural stones and mosaics play a central role in interior design and architecture.

Different sizes and material textures allow for spaces and our perception of them to be deeply characterized.

Color Fill is Kerakoll's range of decorative grouts and sealants for contemporary projects. It has been designed to offer multiple colour combinations and technological solutions to meet the aesthetic and performance needs required in the field of surface coverings.

Aesthetics meets performance.

Joints are much more than just a connecting element in discontinuous surfaces. They are “lines” contributing to the space’s design and they enhance style and furnishing choices.

Color Fill is the complete decorative finishing system that redefines the aesthetic and technological function of grouts and

sealants, in line with design and architectural trends.

The formulations developed by Kerakoll offer suitable solutions for a variety of uses.

50 contemporary shades for endless combinations of joints and surfaces.

The Color Fill palette is designed to offer endless possibilities for the finishing of floors and coverings, from tone-on-tone to contrasting combinations.

The 50 elegant and distinctive shades cover a broad spectrum from the most neutral shades to the most intense colors.

Each colour is marked by a code, shared by all products, which allows for continuity and color balance between surfaces and finishes.

All colors are available for Fugalite Color and Silicone Color.

• Available colors for Silmat Color.

The colors are for indicative purposes only.

Product Range

Grouts

Fugalite Color

Waterproof decorative resin available in 50 contemporary colors for the grouting and bonding of tiles, mosaics and natural stones.

Fugalite Invisible

Waterproof, photochromatic, decorative resin for grouting and bonding of glass mosaic and low-thickness tiles.

Sealants

Silicone Color

Decorative sealant for tiles, mosaics and swimming pools.

Silmat Color

Ultra-matt, elastic decorative sealant.

Options, ideas, applications for every style and need.

Colors and combinations that shape spaces.

Elegantly and distinctively colored joints in line with the latest trends in interior design and architecture that give rooms dynamism and character.

The resulting combinations highlight details and enhance the uniqueness of living spaces.

The 50 shades of Color Fill effortlessly blend with the most varied shapes and materials, allowing for aesthetic consistency even in the case of different applications.

Discreet and essential elegance.

The breadth of the Color Fill palette translates into the possibility of bringing different styles to life, from the boldest to the most linear. The 50 contemporary colors of Fugalite Color offer multiple combinations for unique interior design projects. They create a wide chromatic universe, where elegance, freshness and refined taste are expressed to the maximum.

The choice of neutral shades creates visual continuity with ceramic or natural stone slabs, for perfect tone-on-tone combinations.

The resulting minimalist atmosphere lends lightness to volumes and enhances materials.

Joints - wall Fugalite Color KK 130

Color Fill

Long-lasting performance on every surface.

The smooth finish and high chemical and mechanical resistance of Fugalite Color guarantee aesthetic and functional continuity between joints and surfaces.

Thanks to its waterproof characteristics, it is ideal for grouting in environments subject to a high concentration of damp such as bathrooms.

Joints - walls and floor Fugalite Color KK 130
Sealant - Silicone Color KK 2

Color Fill

Contrasts that create harmony.

Color Fill intense and distinctive shades allow for contrasting combinations that give character and distinction to every environment.

The high colour stability and resistance to ageing and staining of Fugalite Color make it particularly suitable for grouting kitchen floors and walls as well.

Silmat Color's variety of colors

guarantees a smooth match with the materials and grouts used.

Combining high levels of elasticity and surface hardness, it is suitable to seal surfaces subject to expansion and wear, such as kitchen countertops.

Joints - wall Fugalite Color KK 50
Joints - floor Fugalite Color KK 69
Sealant - top sealant Silmat Color KK 2

Visual continuity in a diffused environment.

The natural tones of the joints emphasise the material textures; they contribute to the aesthetic uniformity of the surfaces and the color balance between the different grouts and sealants used.

Waterproofing and highly resistant, Fugalite Color is the ideal solution for ensuring evenness and long-term colour stability, even outdoors.

Thanks to its waterproof characteristics, Fugalite Color is suitable for grouting surfaces subject to prolonged contact with water, such as tanks and swimming pools

Grout - swimming pool Fugalite Color KK 68

Sealant - joints for swimming pool and side joints Silicone Color KK 68

Respect for the environment and technological innovation.

Kerakoll is a certified B Corp Benefit Company; the award is issued by the international body B Lab to organisations committed to high standards of social and environmental performance.

Among the most appreciated aspects that emerged from B Corp's assessment of Kerakoll were the reduction in the use of chemicals, low emissions of Volatile Organic Compounds (VOC), the eco-design of products and sustainable logistics favouring intermodal transport systems

Kerakoll products always put the safety of professionals, the respect for the environment, and the well-being of people first.

That is why, within the Kerakoll GreenLab research centre, we are committed to developing ever more advanced and innovative solutions and technologies for the building sector.

The Color Fill range of decorative grouts and sealants respects these principles and combines sustainable quality with the highest performance.

→ **Low emissions of volatile organic compounds (VOC)**

Our decorative grouts comply with the most stringent emission limits set by the GEV-EMICODE® mark and are thus classified as EC1 Plus.

In the manufacture of our products, we seek to minimise the emission of chemical contaminants, thus guaranteeing better indoor air quality, both for application professionals and building occupants.

→ **Long-term durability**

Our decorative grouts and sealants are tested to withstand stresses that replicate the entire life cycle of the product, ensuring durability and reliability and minimising the need for future repair or maintenance.

Corporation

Joints - wall Fugalite Color KK 50

Sealant - top sealant Silmat Color KK 2

Fugalite Color

Unique performance and
style that leave a mark.

Long-lasting performance on discontinuous surfaces.

Fugalite Color ensures chemical and mechanical resistance performance continuously on any tiles, mosaic or natural stone.

The 50 available shades allow you to obtain infinite combinations for the finishing of floors and coverings, in line with contemporary design trends

Certified durability in all conditions.

Fugalite Color has waterproof characteristics that make it ideal for use both external and internal use, in any environment, including damp environments and environments subject to heavy traffic and wear.

Colour durability tests were carried out by the CATAS laboratory, a certifying body that analyses and tests the quality of raw

materials and finished products. The certified resistance to ageing caused by sunlight, according to standard ASTM G 155.

Guaranteed application even in the toughest situations.

Fugalite Color guarantees the long-lasting performance and function of ceramic coverings and prevents the growth of microorganisms in the joints.

ISO 846:2019 Method A/B/C tests have confirmed that it is an ideal solution for applications in environments with a high concentration of moisture and favourable to mould and bacteria growth, such as kitchens and bathrooms.

Fugalite Color

Ideal workability for an easier application.

Kerakoll researchers have developed a formulation that combines the waterproofing and stain resistance of a resin grout with an ease of working and cleaning superior to that of traditional epoxy grouts.

Fugalite Color

Waterproof decorative resin available in 50 contemporary colors for the grouting and bonding of tiles, mosaics and natural stones.

Fugalite Color is water- and stain-proof, liquid ceramic for joints; it ensures high chemical and mechanical resistance and guarantees the aesthetic and functional continuity of ceramic surfaces.

- Suitable to be used indoors and outdoors,
- including swimming pools
- High chemical resistance
- Stain proof - Can be cleaned easily
- High uniformity and high colour intensity
- Prevents the proliferation of bacteria and moulds (ISO 846 2019: Method A/B/C)
- CATAS-tested for colour durability in external applications
- Conforms to RG as per EN 13888:2021 and R2 as per EN 12004:2017
- Food Grade certified by CFTRI
- Dermatologically certified
- Available in 50 colours

Fugalite Invisibile

Liquid glass for
perfect joints

Solution for the safe and long-lasting laying of glass mosaics.

The liquid “glass” technology obtained from a perfectly calibrated mixture of tiny, pure glass beads and a exclusive transparent resin guaranteeing perfect diffusion of color shades and an unparalleled aesthetic continuity, ideal as an adhesive for laying and grouting of glass mosaic.

Photochromatic, waterproof grout and adhesive that enhances the beauty.

The opalescent, semi-transparent appearance of Fugalite Invisible grout has been tested by GreenLab laboratories to guarantee maximum aesthetic compatibility with wood and marble effect tiles.

Fugalite Invisible makes the joint “invisible” guaranteeing a surface with an even color and appearance, something that cannot be achieved with any other colored opaque cement-based grout.

Designed to improve people's health and well-being.

Just like glass, Fugalite Invisible is waterproof, easy to wash and keep clean. Makes the surface safe from bacteria, mould and fungi even in

damp environments. Strong and easy to maintain, it ensures long-term durability while retaining the aesthetic quality and beauty of mosaics and coverings.

Fugalite Invisible

Waterproof, photochromatic, decorative resin for grouting and bonding of glass mosaic and low-thickness tiles.

Fugalite Invisible are ultra-fine, recycled micro glass beads, with a high refractive power, ideal for bonding and grouting glass mosaics, wood-effect tiles, and low-thickness stone tile effect coverings without compromising the aesthetic, functional and hygienic continuity. Fugalite Invisible is the solution to keep the beauty of artistic glass mosaics and blends intact.

- Ideal to bond and grout glass mosaics
- Ideal to grout thin levelled slabs with narrow or adjacent joints
- Internal floors and walls
- The perfect roundness of the micro glass beads gives an excellent workability
- Impermeable to water, stains and dirt
- Prevents the development of mould and bacteria
- Approved for marine use
- Bacteriostatic and fungistatic product (CSTB method)*

** Tests carried out according to CSTB method, bacterial and fungal contamination*

Joints - walls and floor Fugalite Color KK 130
Sealant - Silicone Color KK 2

Decorative sealants

Finishes that give value
to living spaces.

Specific solutions for every need.

Kerakoll's range of decorative sealants meet the need for elastic sealing and the necessity to create expansion and perimeter joints perfectly matching the colors of the surfaces and materials used. In aesthetic continuity with grouts and surfaces, they guarantee excellent elasticity, watertightness, adhesion and UV resistance, which are fundamental for

protecting structures and coatings in all conditions.

Each product in the range has been developed to offer technical characteristics compatible with the most common building materials, excellent workability and high color stability.

Silicone Color

**Decorative sealant
available in 50
contemporary colors
for tiles, mosaics and
swimming pools.**

Silicone Color develops a high degree of adhesion to non-absorbent surfaces, guaranteeing the integrity and watertightness of porcelain coverings subject to deformation.

- Suitable for porcelain tiles, low thickness slabs
- Suitable for swimming pools and for permanent contact with water
- Resistant to chemical substances
- Resistant to ageing, UV light and frost
- Suitable for damp environments
- High chromatic stability
- Available In 50 colors

Silicone sealant is available in a transparent translucent version.

Rating 3

Based on average color formulations

Silmat Color

Ultra-matt, elastic decorative sealant available in 12 contemporary colors.

Silimat Color develops a high degree of adhesion on porous and non-porous substrates, in all conditions, ensuring integrity and hydraulic tightness of coverings being subject to deformation.

- Suitable for porcelain tiles, low thickness slabs
- Suitable for damp environments
- High degree of adhesion
- High elasticity
- Overpaintable
- High chromatic stability
- Resistant to frost
- Opaque finish
- Odourless
- Available in 12 colors
