

SPONGES AND ACCESSORIES

Spreader

Rubber spreader for Fugalite® application.

- Guarantees complete filling of the gap

Cellulose sponge

Natural cellulose sponge with support plate for handle.

- Powerful cleaning
- Stays clean for longer

Abrasive felt pad

White abrasive felt pad with support plate for handle and felt pad.

- Effective mechanical action

Foam rubber sponge

Fine pore foam rubber sponge with support plate for handle.

- Ideal for extrafine finishing

FUGALITE®

THE RANGE OF PATENTED
WATERPROOF, STAIN-PROOF
GROUTS.

FUGALITE® BIO, the innovative, hypoallergenic, silk-effect, water-based resin.

FUGALITE® BIO PARQUET, specific for wood-effect grouting of ceramic parquet.

FUGALITE®, liquid ceramic for the smooth, unbroken grouting of all ceramic and glass mosaic coverings.

FUGALITE® INVISIBLE, liquid glass for photochromatic effect laying and grouting of glass mosaic.

MMT-TEC code 11/2016 - Ref. GBR Data Report - 02/2016

Cleaning Kit FUGALITE®

Professional tools
for perfect cleaning
of grouted surfaces.

KERA KOLL
The GreenBuilding Company

DETERGENTS AND CLEANERS

Fuga-Wash Eco

Eco-friendly detergent to be used as an additive in water used to clean Fugalite®.

- Facilitates cleaning of covering materials
- Keeps the sponge cleaner

Fuga-Soap Eco

Eco-friendly detergent to remove stains of Fugalite®.

- Ideal for cleaning after fixing
- Suitable for all surfaces

Fuga-Shock Eco

Eco-friendly cleaner, ready to use, for removing residues and streaks of epoxy resins.

- Highly effective
- Floors and walls

PREPARATION

First cleaning with rubber spreader

once the joints have been filled, remove any excess grout that is left on the tiles immediately with the rubber spreader (working diagonally).

Addition of Fuga-Wash Eco to the cleaning water

Recommended dosage: 1 measuring cap for every 5 litres of water. Use the wash-boy ① to carry out the first cleaning pass with a cellulose sponge or abrasive felt pad, removing any excess grout from the flooring. Use wash-boy ② to carry out the second and final cleaning pass, finishing and smoothing the grout in the joint. Change the washing water frequently so that it is always clean. Replace the sponge or felt pad if they become impregnated with product.

FIRST PASS

Cleaning with cellulose sponge

Clean when the grout is still fresh, using a cellulose sponge dampened with the water from wash-boy ①. Use circular movements to soften the film of grout on the tiles and finish the joints. Collect up the emulsion formed on the tiles using the sponge.

Cleaning with abrasive felt pad for structured surfaces

For more structured surfaces, clean when the grout is still fresh, using a felt pad dampened with the water from wash-boy ①. Use circular movements to soften the film of grout on the tiles and finish the joints. Collect up the emulsion formed on the tiles using the sponge.

SECOND PASS

Finishing with a cellulose sponge

Finish cleaning with a cellulose sponge dampened with water from wash-boy ②, working diagonally to the tiles so as not to dig into the joints. Do not walk on the damp floors for at least 12 - 24 hours, to avoid leaving dirt.

Finishing with foam rubber sponge for a smoother joint

For a smooth finish, complete cleaning with a foam rubber sponge dampened with water from wash-boy ②, working diagonally to the tiles so as not to dig into the joints.

THE FOLLOWING DAY

Once the grout has dried, any traces of dirt and streaks can be removed using **Fuga-Soap Eco**, to be diluted in accordance with the amount of grout to be removed and the curing time for Fugalite®. **Recommended dosage:** 2 - 3 parts water to 1 part Fuga-Soap Eco on the day after; undiluted after 3 days.

Distribute the product over the surface to be treated, using the abrasive felt pad and leaving a thin, even film of liquid. **Leave Fuga-Soap Eco to work for about 10 - 30 minutes.**

Collect up the detergent solution with the sponge, rubber scraper or liquid vacuum system for large surfaces. Rinse thoroughly with clean water.

Dry immediately with a dry cloth or liquid vacuum system, without allowing the residual water to evaporate.

Repeat for highly stubborn dirt.

SPECIAL CLEANING

When the grout has hardened (after at least 7 days), any residue and streaks can be removed using **Fuga-Shock Eco**. Distribute the product undiluted over the surface to be treated, using the abrasive felt pad. Leave Fuga-Shock Eco to act for approximately 3 - 5 minutes, then carry out the same rinsing and drying operations indicated for cleaning on the day after application.
